

WHY SUTERA?

SUTERA has revolutionized the outdated waste and recycling industry by focusing on four key areas: safety, ease of use, durability and performance.

Temporary in-ground storage keeps waste at lower temperatures, effectively curbing decomposition, and minimizing odors. Instead of reacting to overwhelming smells, pickups are only needed when SUTERA containers are full.

SUTERA's vertical design leverages gravity for compaction, providing greater capacity compared to traditional dumpsters of the same volume. This decreases the frequency of emptying and minimizes associated costs.

ZERO CLEARANCE SERVICING

- Reclaim valuable parking spaces
- No waste enclosure required
- Convenient, flexible and safe placement

STRENGTH IN DESIGN: CONCRETE & STEEL

- Extensive holding capacity - up to 3000 lbs
- Exceeds hydrostatic pressure - will not float out of the ground
- Environmentally responsible - prevents liquid seepage onto the property
- Impact resistant - no bollard protection required
- Easy to install and relocatable

CUSTOMIZABLE OPTIONS

Patterned, stucco, stone veneer,
vinyl wraps, paintable

WHY IN-GROUND?

- Saves Money
- Aesthetically Pleasing
- No Enclosures Needed
- Minimizes Odors
- Elimination of Vermin
- Takes up less Property
- User Safety and Accessibility
- Emptying is Easy and Clean
- Reduces Unauthorized Dumping
- Gravitational Compaction
