

SUTERA

in-ground waste containment

THE BETTER SOLUTION
SECURE SANITARY SUSTAINABLE

NEW DESIGN

Parks & Recreation
Waste Containment

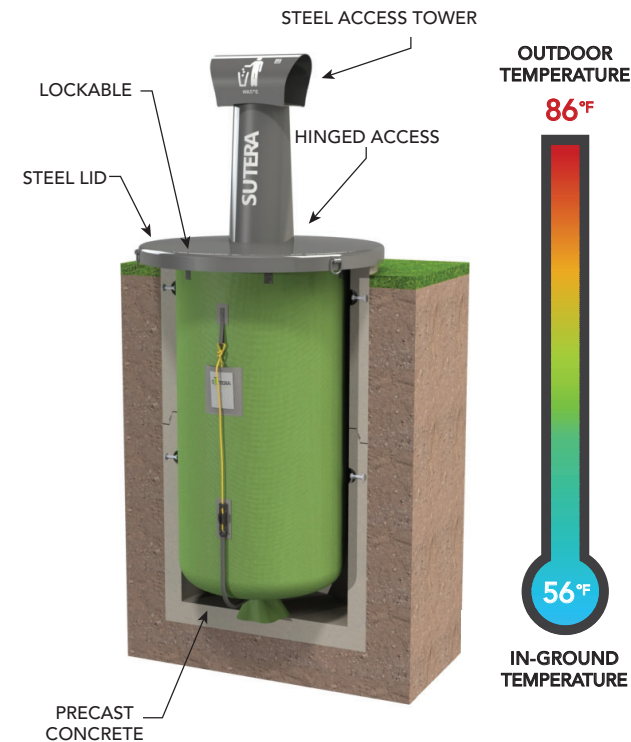

SUTERA Parks and Recreation Units place 100% of the containment well underground with only the attractive steel tower visible. This unit was designed for public use in Parks and Recreational places and has no moving parts. The touch-free disposal is hygienic, reducing bacteria transfer.

The precast concrete's weight resists hydrostatic pressure, eliminating any chance of lifting out of the ground. Disposed materials remain cooler, out of direct sunlight beneath the earth's surface, reducing odour and will not leak into the surrounding soils.

Built to withstand the elements, and engineered to be safe, secure, fire resistant and user friendly.

PARKS & RECREATION WASTE CONTAINMENT

Utilizing a Steel Lid, Concrete
Containment Well and Reusable PVC Bag

Available in 3 sizes to suit your specific needs.
Capacity ranging from 0.71 to 3.72 cu. yds

VERTICAL LIFT SERVICE

The SUTERA Parks & Recreation Waste Container is emptied vertically utilizing SUTERA's crane trucks. SUTERA specialized light weight trucks are able to maneuver in tight spaces without causing damage to paths.

STRENGTH IN DESIGN

- No-touch hygienic disposal
- Economical: 69% servicing cost savings
- Large Capacity
- Durable: Steel fabrication with powder coat paint finish
- Custom color and wrap options available
- Secure: Tamper proof, lockable lid
- Relocatable
